Q. So Ivan and Harmony both said their stomach was upset?
A. Yes.
Q. At 2:30 a.m.?
A. Correct.
Q. And so Harmony woke up her dad?
A. Yes.
Q. And where was he?
A. He was in bed.
Q. So did she come in the room and wake him up?
A. She came in our room, yeah.
Q. And did she wake you up because she was concerned?
A. She just said, I want to take some medication for my -- she was telling him, I'm going to take some medication for my stomach.
Q. What medication was she going to take?
A. Well, she was going to take one of his -- he had medications in his thing for nausea, in his little -- in his little cupboard.
Q. Okay. So that's why she woke him up?
A. Yes.
Q. Okay. And what medication specifically for nausea?

A. Well, there was three in there. One was Zofran, sublingual; one was Phenergan, that was oral; and then the Compazine was oral. But we never even opened the Compazine bottle ever. It was just in there if he had irretractable vomiting.

Q. Do you know whether Harmony took the Compazine?

A. Oh, no, she didn't take the Compazine.

Q. Do you know whether she took the Zofran?

A. The Zofran she took -- yeah, she got the Zofran sublingual when she went -- that was before, like on Sunday night. She said, I'm going in, I'm taking -- I'm taking one of Dad's pills for nausea.

Q. Is this before the 2:30 a.m. wake-up?

A. Yes.

Q. So she had already had a dose of Zofran?

A. Yes.

Q. And she's taking another one at 2:30?

A. Well, she -- I didn't know what she took. But she -- but apparently she took Phenergan because it was on the drug -- it was on her tox screen. So her and her dad probably both took Phenergan. Because I didn't have any say-so

in that. I was -- I was -- I was like, Okay, they're handling it.

Q. Did you observe Harmony take Zofran at any point?

A. No.

Q. Did you observe Harmony take Phenergan at any point?

A. No.

Q. Did you go and get the medication for her?

A. No.

Q. Okay.

A. She knew where it was because she had to know where all his medications were and what they were for, and I had it marked on the -- on each line of each medication. Because she had to know what to give him and what it was for if something happened to me. So she was totally able to understand what she was doing, and she didn't need me to tell him.

Q. And I think you answered this, did you actually witness her vomiting?

A. No.

Q. Did she tell you that she had been vomiting?
