MARTIAN SALES, INC; JOPEN, LLC, A TEXAS LIMITED LIABILITY COMPANY; JOHNSON FOODS, LLC, A WYOMING LIMITED LIABILITY COMPANY; LP IND., LLC, A WYOMING LIMITED LIABILITY COMPANY; CAG HOLDINGS, LLC, A WYOMING LIMITED LIABILITY COMPANY; RMH HOLDINGS, INC., A WYOMING CORPORATION; ABC INSURANCE COMPANY AND JOHN DOES 1-4

MAGISTRATE: DONNA PHILLIPS

****

REMOTE VIDEOTAPED DEPOSITION OF

AMBER R. WANG, M.D.,

taken on Thursday, January 15, 2026, before Lisa M. Nealy, RPR, CCR, in and for the State of Louisiana, via Videoconferencing, commencing at 9:00 a.m. and concluding at 12:15 p.m.

A I see congestion, specifically pulmonary congestion, in all sorts of deaths. And it's a very, very nonspecific finding.

Q Okay. So you don't agree with that, generally? That the heavy organs are usually found in mechanical or pumping action issues, not electrical heart issues?

A I would say that congested lungs specifically, or congested organs, are and can be associated with a pumping failure of -- for some underlying reason, but can also be seen in other deaths.

Q Okay. Would you agree with me, though, it's more often that you see them with the pumping action versus the electrical action?

A Yes.

Q Okay. But you're just saying it -- if you see that, it doesn't mean that it was -- automatically mean that it was a mechanical or a pumping action issue and not an electrical. It's not -- it's not a decisive feature.

A Correct.

Q I got you. Okay.

Okay. I think we're here. The final conclusion. Okay? So, you have testified today

that you don't have enough information to know whether mitragynine causes death. Fair?

A That is true.

Q Okay. However, you have listed it as a cause of death or a contributory factor to a cause of death in autopsies that you've seen.

A I have.

Q Okay.

A Based on the reasoning discussed previously.

Q Sure. In this case, I think as we've covered several times, and I'm just summarizing at the end -- strike the "in this case."

When mitragynine is -- in the case studies in which mitragynine is, or Kratom, is listed as the cause of death or a contributing factor, you would agree that the majority of them are poly, um -- sorry. Polypharmacy cases.

A Yes.

Q Correct? Okay. So, a potential interaction between drugs such as opioids, central nervous system depressants, and, um, alcohol, is certainly possible.

A It's possible.

Q Right. Okay. You would agree with me

several times so I -- save your "asked and answered" because I know, and I promise I won't do it again -- but we agree on the mechanism of death, we simply disagree on the cause.

A Correct.

Q Okay. And you don't know one way or the other as to whether mitragynine could have been the cause of death in this case.

A I know that her coronary artery anomaly and her enlarged heart killed her.

Q Okay. And -- but you do not take into account that her -- that mitragynine could have exacerbated her high ostia takeoff and her enlarged heart?

A There is no --

Q Correct?

A -- evidence -- there is no evidence, to date, that would suggest that mitragynine had any role in exacerbating her heart condition.

Q Right. But that would just go back to, you don't know whether it happens or not.

A Can you --

MS. PAYTON:

Object to the form.

BY MS. HICKMAN:

Q You don't know, as we sit here today -- you just said there's no evidence one way or the other, as to whether mitragynine exacerbates issues such as her cardiomegaly, or as -- what you found, or her high ostia takeoff?

A Right. I don't think that there's evidence yet to suggest that it does.

Q Right. And so I -- I'm saying to you, you don't know one way or the other whether it does.

A Correct.

Q And you didn't even consider -- you do not, as we sit here today, even consider that mitragynine could have done that?

A Right. There's no indication that it did, or can.

Q Okay. But there's no indication that it did not either?

A Sure.

MS. HICKMAN:

Okay. That's all the questions I have.

MS. PAYTON:

We have no questions.

MS. HICKMAN:
